

Part of the Flyte Microsoft 365 App Suite

Clock in App

A streamlined solution for shift working employees & frontline workers

The Flyte Clock In app is a streamlined solution for shift working employees & frontline workers to record worked hours by utilising your existing Microsoft 365 infrastructure. Accessed through a personal or shared device, clock data is stored for payroll to access and process. The solution also enables Organizations to capture overtime hours to be accrued and redeemed by staff where required.

Need a way to manage and track Overtime accrual across the Team?- With the optional feature for tracking contracted hours vs. clocked hours within the application, Overtime Leave hours can be easily banked and utilised by staff as and as when required without significant Admin resource.

The image shows a tablet displaying the 'Overtime Booking' app interface. The screen is divided into two main sections. The top section is a form for recording overtime hours, and the bottom section is a summary of booked hours.

Overtime Booking

Available Balance: 15.37 Hrs

Full Name: Robbie Butler

Start Time: DD/MM/YY HH:mm

End Time: DD/MM/YY HH:mm

Hours Taken: 7
