

Our Solutions

Bespoke workplace solutions for M365

Empowering people, Elevating organisations

Digitally Transform Your Leave Request Process

Easily Respond to and Track Employee Leave Requests

Many organisations are still using a manual leave request application process that is time consuming, inefficient, and frustrating for employees. Our leave request app has been built leveraging the Microsoft Power Platform and can be accessed through your company intranet and Microsoft Teams.

Employees can easily view their remaining annual leave allowance, make new requests, and view upcoming and previously approved annual leave requests. This saves your organisation time previously spent laboriously inputting, tracking, and responding to requests.

- Quick and easy submission of Leave Requests, R&D days and/or Sickness
- Accessible via the Company Intranet, Microsoft Teams and mobile devices
- Built-in Admin Portal for Leave and User Management
- View and manage upcoming Leave Requests across the organisation
- Easily track remaining Leave balances for individual users
- Admin control to Add and Manage Leave on behalf of Employees
- Ability to manage multi-country Leave rules and Allowances

Base Solution Cost: £3,100

1-year subscription

Cost includes Install, Training and Support

Customisation costed separately

Empowering people, Elevating organisations

Introducing Flyte

As a Microsoft M365 specialist, Flyte has extensive experience developing and delivering custom apps and solutions on the Microsoft Power Platform.

Our journey started in 2012 as Cloud Cover IT, an IT Managed Services provider, with a mission to empower organisations through technology across the central belt of Scotland, UK. In 2016 we became a Microsoft Gold Partner with the strategic ambition to become the leading Microsoft Consultancy practice in Scotland, known for leveraging the Microsoft technology stack to empower business.

As opportunities with Microsoft and the Modern Workspace have continued to grow, Flyte is the next stage in the journey to becoming recognised as a market leader in cloud technology solutions on an expanding, global platform.

Our Solutions

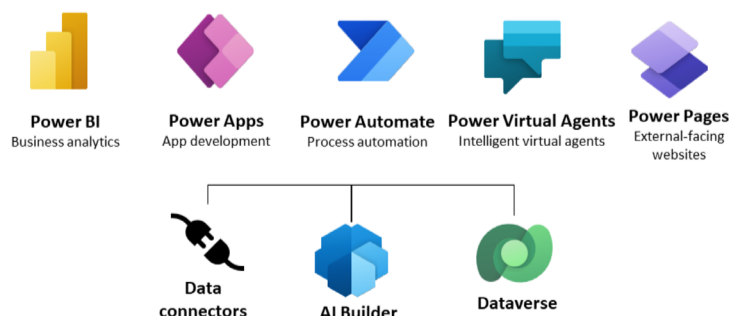

Flyte Workplace Solutions have been developed to deliver effective, digital management of critical Business Processes.

Built on the Microsoft Power Platform, our solutions integrate seamlessly with your existing Microsoft 365 infrastructure and systems, and a single platform approach-

- Utilising existing user accounts & licences*;
- Linking directly with Teams, SharePoint, Outlook, PowerBI, & Dataverse (where required)

The Microsoft Power Platform offers robust security features while adhering to the highest standards of data protection and compliance- essential factors for introducing reliable, secure systems.

All apps can be customised to suit specific needs and requirements

*new licenses may be required depending on solution.
