

Part of the Flyte Microsoft 365 App Suite

Guest Sign in App

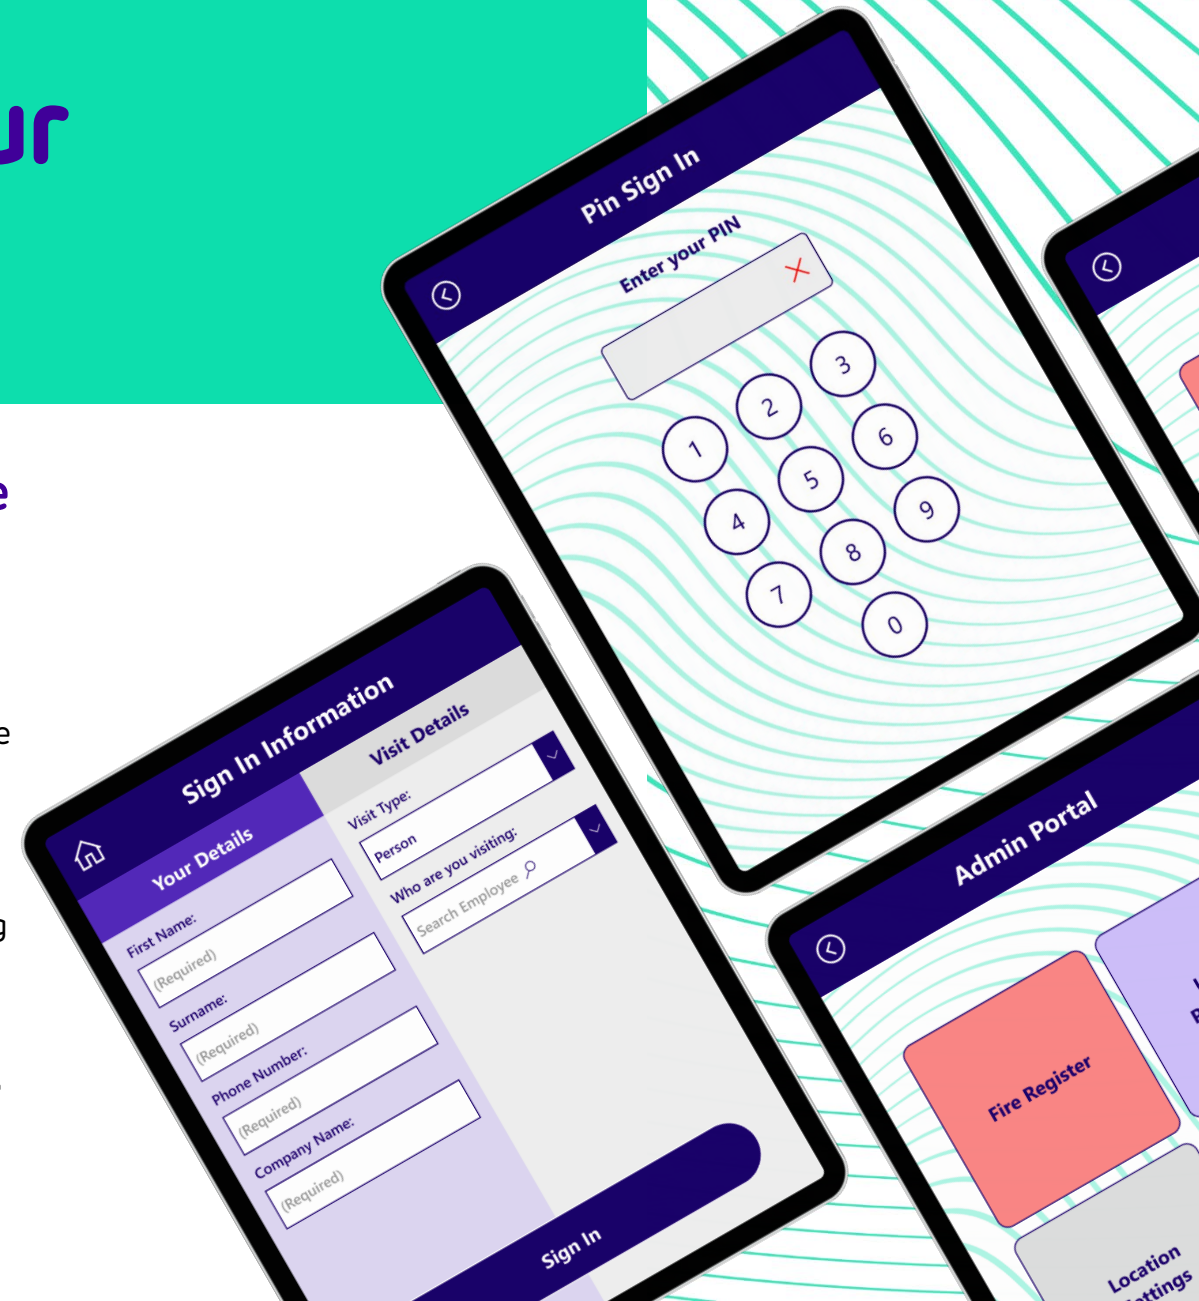

Digitally Transform Your Guest Sign in Process

Take control of your Guest Sign-In Experience

The Flyte Guest Sign In application provides a streamlined and configurable touchpoint for users to sign into a building, office or location. The application provides a range of configurations as standard to suit businesses of any type, size or visitor type- perhaps Employees need to quickly sign in using PIN access, but new visitors need to provide their name, select who they are visiting and take a photo for a badge- the application can support the experience you wish to provide users.

By bringing all sign in data into a digital platform, the Guest Sign In application is a GDPR compliant solution linked directly into your existing Microsoft 365 infrastructure.

In addition to providing a streamlined Sign In experience, the Guest Sign In application doubles as a digital Fire Register for Emergency situations. Easily see who is signed in, check off all persons are accounted for and quickly identify who is not.

Customise Your Visitor Experience

- Customisable design and sign in steps
- Customisable visitor data collection
- Real-time analytics
- Beverage selection
- GDPR compliant
- Email notification of arrivals
