Your Copilot Pilot Is Going Well...

- ✓ People are using it
- ✓ Time is being saved
- ✓ New use cases are emerging
- ✓ Excitement is building

Then someone asks:

"What happens when we roll this out to everyone?"

This Is Where Governance Matters

Before scaling Copilot, ask:

- 🔑 Who should have access?
- 📁 What information can Copilot see?
- 🛡️ How do we protect sensitive data?
- 📋 What policies need to be in place?
- 📈 How will we measure success?

Don't Skip the Middle Step

Avoid going straight from:

*"Let's try Copilot" to
"Everyone has Copilot!"*

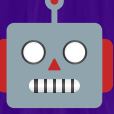

Without a clear plan, governance and adoption strategy in between.

Successful AI starts with strong foundations.

What Good Governance Delivers

-  Smarter use of AI
-  Better security and control
-  More confident users
-  Consistent adoption
-  Clearer business outcomes

The goal isn't just deploying Copilot.
It's making sure it delivers value at scale.
